

1.Recycle (Symbol 27)

Function: Indicates that the packaging material is recyclable.

Remarks: Should be disposed of properly to promote environmental sustainability.

2.Do not stack more than 10 layers (Symbol 24)

Function: Specifies the maximum number of layers for stacking.

Remarks: Exceeding this limit may cause damage to the packaging and the products

inside.

3.This side up (Symbol 4)

Function: Indicates the correct orientation of the package.

Remarks: Improper positioning may lead to product damage or spillage.

4. Handle with care (Symbol 19)

Function: Suggests careful handling during transportation.

Remarks: Proper handling equipment should be used to prevent damage.

5.Keep dry (Symbol 6)

Function: Indicates that the product should be kept away from water or moisture. **Remarks:** Should be stored in a dry place to prevent packaging deterioration.

6.Keep away from heat (Symbol 7)

Function: Specifies that the product should not be exposed to heat or direct sunlight. **Remarks:** High temperatures may degrade product quality or cause unwanted changes.
